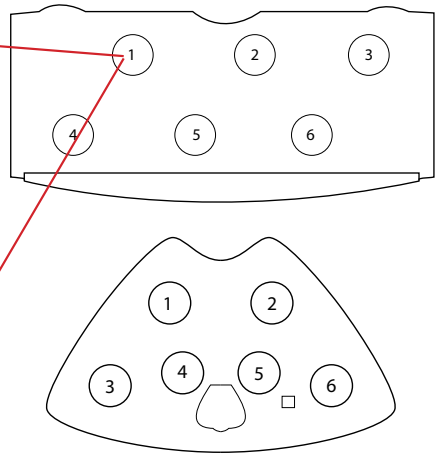
Space•Saver 6 & AeroGarden™ 6
(all 6-Pod models) Gardener's Reference and Log

Planting a custom garden in an AeroGarden is a bit of an experiment. Keeping track of your plantings will help you plan your next garden.

Use the blank garden layout (*shown below*) as a reference for each plant's pod location. (*Careful Grow Pod location can make a difference in how well plants do in your AeroGarden.*)

Record what you've planted in each pod in the corresponding space on your log.



Sample Gardener's Log

Pod #	Plant Type (# of seeds planted)	Planting Date	Germination/ Rooting Time	Nutrient Regime*
1	Chives (20)	9/1/08	7 days	B
2	Parsley (6)	9/1/08	11 days	B
3				
4				
5				
6				

* ***Nutrient regime options found on page 15 of the Master Gardener Guide.***

Use the log to record and track the progress of your garden. Take notes as needed in the area provided on each page. Your log can serve as a great reference when planting future gardens.
