

AeroGarden™ Mini and AeroGarden 3 Gardener's Reference and Log

Planting a custom garden in an AeroGarden is a bit of an experiment. Keeping track of your plantings will help you plan your next garden.

Use the blank garden layout (shown below) as a reference for each plant's pod location. (Careful Grow Pod location can make a difference in how well plants do in your AeroGarden.)

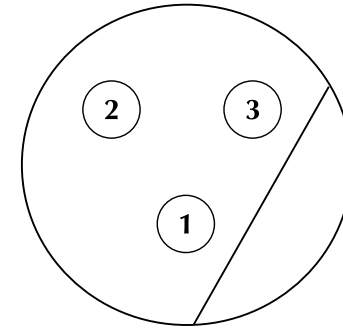

Record what you've planted in each pod in the corresponding space on your log.

Use the log to record and track the progress of your garden. Take notes as needed in the area provided on each page. Your log can serve as a great reference when planting future gardens.

Sample Gardener's Log

Pod #	1	2	3
Plant Type (# of seeds planted)	Chives (20)	Parsley (6)	
Planting Date	1/1/09	1/1/09	
Germination/ Rooting Time	7 days	11 days	
Nutrient Regime*	B	B	

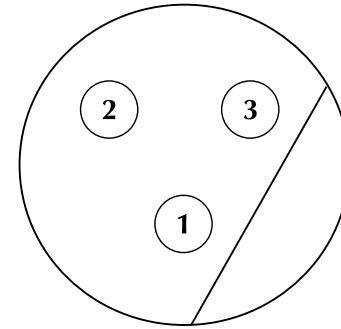

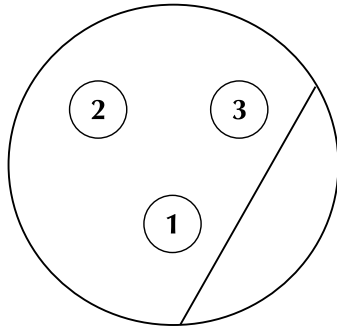

* Nutrient regime options found on page 15 of the Master Gardener Guide.
